

Saad Sherif

iOS Developer | SwiftUI · Clean Architecture · Real-time & Offline-first Apps

+20 109 377 1745 | saadsherif02@gmail.com | linkedin/saad-sherif | github/Sa3doola | Desouk, Egypt

PROFILE

iOS Developer with 5 years of experience shipping production apps in Swift, SwiftUI and UIKit for clients in Egypt and Kuwait. Strong in Clean Architecture (MVVM + Coordinators), real-time chat and calls, payments, and offline-first apps. Delivered 50+ releases and apps serving 10K+ users. Comfortable working in Arabic and English with backend, Android, QA and product teams.

WORK EXPERIENCE

iOS Developer & Tech Lead (Freelance)

Aug 2026 – Present | Remote, Egypt

Mesllah

- Lead iOS development and technical decisions for a livestock management ERP used by a Kuwaiti client: production, feed, medications, vaccinations, invoicing and breeding requests.

iOS Developer (Contract)

Feb 2026 – Jul 2026 | Remote, Egypt

InnovaDigits 

- Built the Event-Box iOS app end to end, from project setup to App Store release, using SwiftUI and Clean Architecture (MVVM + Coordinators).
- Implemented vendor booking with payment summaries, QR-code guest invitations, a gift registry and a loyalty points system.
- Worked in a cross-functional team of business analysts, QA, backend and Android developers, and relayed requirements and changes between the backend team and the Android developer.

iOS Developer

Sep 2021 – May 2026 | Mansoura, Egypt

AAIT 

- Built and maintained 5+ client iOS apps (Swift, UIKit) serving 10K+ users, in a 10-person team; shipped 50+ releases through TestFlight and App Store Connect.
- Delivered apps in legal consultation, live education, service marketplaces, livestock ERP and social networking, with real-time calls, video, chat and live location tracking.
- Integrated REST and WebSocket APIs and added local caching that cut load times by 20%.
- Worked with backend, product and design teams to plan and deliver features.

SELECTED PROJECTS

Event-Box (InnovaDigits)

- Event-planning marketplace for weddings, birthdays and corporate events; bilingual Arabic/English, iOS 17+. SwiftUI, @Observable, async/await, independent per-tab NavigationStacks, Pusher chat, deep-link and push routing.

Mesllah (AAIT, then freelance)

- Livestock management ERP for a Kuwaiti client. UIKit, Clean Architecture, Core Data offline-first with background sync, Combine, deep linking, Dark/Light Mode.

Qetass (AAIT)

(User  /Lawyer 

- Legal consultation platform delivered as two apps (User and Lawyer). OpenTok voice/video, CallKit, PushKit, AVFoundation.

Yussr Education (AAIT)

(Student  /Teacher 

- Live-streaming education platform for iPad, with Student and Teacher apps. Agora video classes, a shared real-time whiteboard, WebSocket chat.

Al-Kharashi (AAIT)

- Private family social app with an interactive family tree, posts, magazines and events feeds.

Serva (AAIT)

(Client  /Provider 

- Service marketplace with Client and Provider apps. Socket.IO chat, Google Maps live provider tracking.

TECHNICAL SKILLS

- **Languages & Frameworks:** Swift 6, SwiftUI, UIKit, Combine, Observation
- **Architecture:** Clean Architecture, MVVM + Coordinators, modular codebases, SOLID, dependency injection
- **Concurrency:** async/await, actors, Sendable, @MainActor, Swift 6 strict concurrency
- **Networking & Data:** REST (URLSession, Alamofire), WebSockets, Core Data, Realm, offline sync
- **Real-time & Media:** Agora, OpenTok, CallKit, PushKit, AVFoundation
- **Tooling & Delivery:** Git, Swift Package Manager, CocoaPods, TestFlight, Arabic/English localization (RTL)
- **AI-Assisted Development:** Claude Code and Codex agentic workflows
- **Payments:** HyperPay, Moyasar, PayTabs

EDUCATION

Bachelor of Computers and Information
Mansoura University 

2016 – 2020 | Mansoura, Egypt

LANGUAGES

Arabic — Native

English — professional working proficiency
